Who is Raven?

Raven Industries, Inc. is a diverse, publicly held company. Founded in 1956, the corporation consists of three major operating divisions and one subsidiary which manufacture and supply flexible films, electronics, special apparel and inflatables to major markets throughout the United States and abroad. From High Altitude Research Balloons for N.A.S.A. to GPS based control systems, Raven has a reputation of excellence.

Within Raven Industries operating units, we have been helping customers with their flexible film needs for more than 35 years and have the resources to ensure longevity within our industry. You can draw on both our financial strength and manufacturing experience to get the products you need.

Did you know...

- ...we were ranked 71 out of Forbes' list of America's 200 best small companies?
- ...our phone is answered by a living, breathing person and not a recording?
- ...we produce millions of pounds of polyethylene film products delivered promptly nationwide each year?
- ...we are traded on the NASDAQ as RAVN?

Why Choose Raven?

Over the past 40+ years, customers have trusted Raven to meet their specialty construction film needs. Here are some reasons why:

One-Stop Shop

Raven is your one-stop shop, where you can choose from a tremendous selection of in-stock products, including reinforced poly, vapor retarders, concrete curing covers, air infiltration barriers, and the accessories to go along with them, all in one call! When you buy from Raven, you can count on us to manufacture your order in-house by extruding, laminating, and converting films from start to finish.

Outstanding Service

At Raven, we don't just offer the best film products in the industry, we also provide you with the best service. Our experienced sales staff will handle your call courteously and efficiently, by providing a timely price quote including availability and freight cost to your location. We will then accurately place your order and follow through to ensure it ships promptly. We also have dedicated marketing reps available to work directly with you and your staff to help with product training and find the solutions to your customer's requirements.

Custom Solutions

Sure, we produce millions of pounds of polyethylene films each year. But when you're looking for more than an everyday solution, just call Raven and we'll get the job done. For more than 40 years, Raven has helped customers solve their film requirements. We've custom designed polyethylene films for unique applications from start to finish, modified existing products, introduced new sizes and colors -- you name it, we've done it!

Competitive Prices

Our products are designed to provide a quality solution at a competitive price, giving you a cost-effective choice in your construction film needs.

100% Performance Guarantee

Worried about protecting your purchase? Raven guarantees our materials to be free from manufacturing defects at the time of shipment and will offer replacements as outlined in our Limited Warranty.

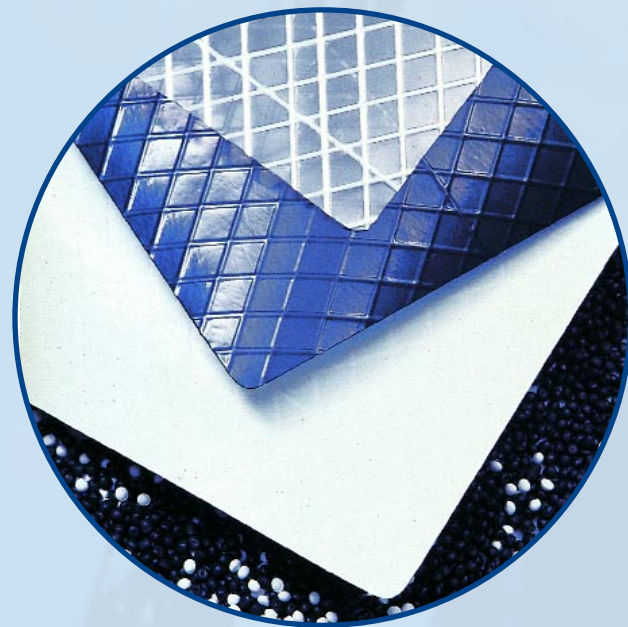

Quality Assurance

The core mission of every Raven employee is to deliver quality products and service to construction supply professionals. Helping you make informed and accurate choices about the products you need is an objective that we all take very seriously. Every member of our dedicated sales staff undergoes extensive training on our entire product line and the markets they serve, to assure that your getting the right answers when you need them.

FILM PRODUCTS:**

Performance Films. Delivered.

Enclosure Films

Our building enclosure films are made from quality materials resulting in durable, reinforced poly sheeting that outperforms the competition. Economically priced, Dura-Skrim® is constructed with a high strength polyethylene film and heavy-duty scrim reinforcement, laminated together with a layer of molten polyethylene. We use a generous amount of reinforcement in our string reinforced poly, our string pattern is uniform and offers tear resistance in both machine and transverse directions unlike many of our competitors. The result is sheeting that resists puncturing and responds to tears immediately by surrounding and stopping the tear.

Vapor Retarders

Vapor retarders save time, money and energy by reducing moisture migration under concrete slabs and foundations, and through inner walls and ceilings. We have a wide variety of vapor retarder products to choose from that are made from state-of-the-art polyethylene resins for superior physical and performance properties. Our vapor retarders meet or exceed ASTM E-1745 (Plastic Water Vapor Retarders Used in Contact with Soil or Granular Fill Under Concrete Slabs) Class A, B & C requirements.

Wet Curing Blankets

Conkure™ Wet Curing Blankets are reflective blankets designed to be hydrated and inhibit moisture loss during the curing process of concrete. Our curing blankets consist of an absorbent synthetic needle-punched geotextile laminated to a white reflective UV stabilized film. Conkure™ Wet Curing Blankets meet or exceed AASHTO M 171 and ASTM C 171, "Standard Specification for Sheet Materials for Curing Concrete" for moisture retention and daylight reflection. Unlike burlap, it will not rot, mildew, or stain and can be reused when cared for properly. Conkure™ Wet Curing Blankets also work well for the critical curing of decorative and colored concrete.

Housewrap & Flashing

Rufco-Wrap® housewrap helps create a more comfortable, energy-efficient building and reduces the chance for damage from water and moisture intrusion. Our Rufco-Wrap® residential and commercial wrap provides the best combination of strength, breathability and protection of any housewrap on the market. Rufco Shield™ self-adhering window and door flashing is a superior air/vapor barrier and waterproofing membrane. Rufco Shield™ seals window & door perimeters to building substrates to create an impenetrable barrier.
