Re: QPL Product Evaluation, QPL 2010-016

Dear Mr. Gothro:

The evaluation of Storm Sentinel 1341, internal catch basin and inlet protection, manufactured by Enpac LLC has been completed.

The submittal and sample for the Storm Sentinel 1341 indicates the product conforms to WSDOT Standard Specification for Road, Bridge and Municipal Construction (2010) Section 8-01.3(9)D. Therefore, this product has been added to the Qualified Products List (QPL). A copy of the listing is enclosed. The acceptance code "CA" denotes that the product is "Conditionally Approved" and "2010" indicates that acceptance on the job will be on receipt of an acceptable Manufacturer's Certificate of Compliance by the field inspector, and that the product submitted by the Contractor is the same as approved on the QPL page and is being used in accordance with the plans and specifications.

The QPL is available on the Internet at: [www.wsdot.wa.gov/biz/mats/qpl/qpl.cfm](http://www.wsdot.wa.gov/biz/mats/qpl/qpl.cfm).

If there are any questions concerning this matter, please contact Steve Hughes at (360) 709-5442.

Sincerely,

Kurt Williams, P.E.  
Construction Materials Engineer
