

TURBIDITY CURTAIN

Turbidity curtains are designed to prevent the migration of silt and sediment in water sources of low to moderate current. The curtain is designed using high quality woven geotextile. This fabric has high grab strength and excellent longevity properties.

The information presented herein, while not guaranteed, is to the best of our knowledge true and accurate except when agreed to in writing for specific conditions of use. No warranty or guarantee expressed or implied is made regarding the performance of any product since the manner of use and handling are beyond our control. Nothing contained herein is to be construed as permission or as a recommendation to infringe any patent.
